Strategy Frameworks You Can Use at Work

Hi! Thank so much for joining me for “How to Think Strategically, Like a CEO.” I hope you learned at least one useful thing to help you in your career.

One of the most important aspects of thinking strategically is to make your thoughts transparent in the form of pictures and diagrams, so others can share them with you. You can often create your own frameworks, and I’ve also compiled some articles that list a number of strategy frameworks you can use:

<https://www.extension.harvard.edu/professional-development/blog/6-tools-every-business-consultant-should-know>

<http://www.quickmba.com/strategy/>

<https://www.mbopartners.com/resources/article/top-business-frameworks>

<https://creately.com/blog/diagrams/essential-diagrams-draw/>

https://www.mindtools.com/pages/article/newTMC_04.htm

<http://timkastelle.org/blog/2012/01/eight-models-of-business-models-why-theyre-important/>

<https://www.clearpointstrategy.com/strategic-planning-models/>

I encourage you to let these frameworks inspire you. Learning to diagram your thinking takes time. Look for people in your organization, industry, or function who do it, and ask them for assistance with an issue you’re tackling. Using frameworks is such a vital skill for any strategic role.

By the way, if you’re an existing or emerging leader, and you’re trying to navigate a challenging situation with clarity and confidence, I’d love to help you use strategy and psychology if you’re looking to ...

- Get promoted
- Develop stronger leadership
- Cultivate greater confidence
- Increase your conflict management skills
- Navigate power and politics at work

Call me at (415) 508-8250 or email me at hello@DrSusanBernstein.com for a complimentary 30-minute career consultation.

Wishing you well in your career,

Susan Bernstein, MBA PhD
